

## AMENDMENTS TO THE CLAIMS

Please amend the claims as follows:

- 1           1. (Currently amended) A method for tracking the use of resources on a  
2     website comprising the steps of:
  - 3           a.) receiving a request for a resource, the request originating at a  
4                 client;
  - 5           b.) determining whether the request for the resource includes a visi-  
6                 tor identifier;
  - 7           c.) responsive to the request not including the visitor identifier:  
8                 assigning a new visitor identifier; and  
9                 sending a redirection request with the new visitor identifier  
10                to the client;
  - 11          d.) categorizing data sent with the request for the resource; and  
12          e.) repeating steps a-d until reaching a session expiration.
- 1           2. (Currently amended) The method ~~for tracking the use of resources on a~~  
2     ~~website as in~~ of claim 1, wherein the visitor identifier comprises a cookie.

1           3. (Currently amended) A method for tracking the use of resources on a  
2 website comprising the steps of:  
3           a.) receiving a request for a resource from a requestor, the requestor  
4                 having an address;  
5           b.) determining whether the request for the resource included a do  
6                 not repeat indicator;  
7           c.) responsive to the request including the do not repeat indicator,  
8                 assigning a visitor identifier from the requestor's address;  
9           d.) categorizing data received with the request for the resource; and  
10          e.) repeating steps a-d until reaching a session expiration.

1           4. (Currently amended) The method ~~for tracking the use of resources on a~~  
2 ~~website as in~~ of claim 3, wherein the visitor identifier comprises a cookie.

1           5. (Currently amended) The method ~~for tracking the use of resources on a~~  
2 ~~website~~ of claim 1, wherein determining whether the request for the resource ~~in-~~  
3 ~~cluded~~ includes a visitor identifier ~~further~~ comprises ~~the steps of:~~  
4                 comparing the visitor identifier with a range of valid visitor identi-  
5                 fiers; and,

6 in response to the visitor identifier being outside the range of valid  
7 visitor identifiers, indicating that the request did not include  
8 the visitor identifier.

1 6. (Currently amended) The method ~~for tracking the use of resources on a~~  
2 ~~website as in~~ of claim 5, wherein the visitor identifier comprises a cookie.

1 7. (Currently amended) The method ~~for tracking the use of resources on a~~  
2 ~~website of claim 1, wherein categorizing data received with the request for the~~  
3 ~~resource~~ step d.) comprises the steps of:

4 categorizing the data ~~received with the request for the resource by~~  
5 at least one selected from the group consisting of a visitor  
6 identifier, a page identifier, and a time stamp.

1 8. (Currently amended) The method ~~for tracking the use of resources on a~~  
2 ~~website as in~~ of claim 7, wherein the visitor identifier comprises a cookie.

1 9. (Currently amended) The method ~~for tracking the use of resources on a~~  
2 ~~website of claim 1 or claim 2, wherein step e.)~~ comprises:  
3 repeating steps a-d for a predetermined amount of time.

1 10. (Currently amended) The method ~~for tracking the use of resources on~~  
2 ~~a website of claim 1 or claim 2, wherein step e.)~~ comprises:

repeating steps a-d until receiving a particular request for a resource.

11. (Currently amended) A data collection server for tracking the use of resources on a website comprising:

a communication interface for receiving a request for a resource and sending a visitor identifier;

a cookie handler coupled to the communications interface for testing the request for the resource;

checking whether a do not repeat indicator is present in the request for the resource; and

assigning the visitor identifier;

a session controller coupled to the cookie handler for signaling ~~the~~ a session end for a particular visitor identifier; and,

a repository for storing data sent with the request for the resource.

12. (Currently amended) ~~The method for tracking the use of resources on a website as in~~ data collection server of claim 11, wherein the visitor identifier comprises a cookie.

13. (Currently amended) ~~A~~ The data collection server of claim 11 ~~for tracking the use of resources on a website of claim 7, wherein the~~ a cookie han-

3 dler for testing the requested for the resource and creating the visitor identifier  
4 further comprises:

5           a means for sending sends a do not repeat indicator associated with  
6           the visitor identifier, coupled to the communication inter-  
7           face; and,  
8           a means for checking whether the do not repeat indicator is present  
9           in the request for the resource, coupled to the communica-  
10          tion interface.

1           14. (Original) A method for tracking the use of resources on a website  
2     comprising the steps of:

3           sending a request for a resource to a data collection server;  
4           in response to the request not including a visitor identifier:  
5           receiving a new visitor identifier and a redirection request  
6           from the data collection server;  
7           sending the request for a resource with the new visitor iden-  
8           tifier to the data collection server; and,  
9           receiving the requested resource.

1           15. (Currently amended) The method for tracking the use of resources on  
2     a website as in of claim 14, wherein the visitor identifier comprises a cookie.

1           16. (Original) A method for tracking the use of resources on a website  
2   comprising the steps of:  
3           sending a request for a resource to a data collection server;  
4           in response to the request not including a visitor identifier:  
5           receiving a do not repeat indicator and a redirection request  
6           from the data collection server;  
7           sending the request for a resource with the do not repeat in-  
8           dicator to the data collection server; and,  
9           receiving the requested resource.

1           17. (Currently amended) The method ~~for tracking the use of resources on~~  
2 ~~a website as in~~ of claim 16, wherein the visitor identifier comprises a cookie.

1           18. (Currently amended) ~~One or more computer-readable storage devices~~  
2 A computer program product having computer readable code embodied thereon  
3 ~~said computer-readable storage devices~~, said computer readable code for pro-  
4 gramming one or more computers to perform a method for tracking the use of  
5 resources on a website comprising the steps of:  
6           a.) receiving a request for a resource, the request originating at a  
7           client;

- b.) determining whether the request for the resource includes a visitor identifier;
- c.) responsive to the request not including the visitor identifier:
- assigning a new visitor identifier; and
  - sending a redirection request with the new visitor identifier to the client;
- d.) categorizing data sent with the request for the resource; and
- e.) repeating steps a-d until reaching a session expiration.

19. (Currently amended) ~~One or more computer-readable storage devices~~  
A computer program product having computer readable code embodied ~~thereon~~  
~~said computer-readable storage devices~~, said computer readable code for programming one or more computers to perform a method for tracking the use of resources on a website comprising the steps of:

- a.) receiving a request for a resource from a requestor, the requestor having an address;
- b.) determining whether the request for the resource included a do not repeat indicator;
- c.) responsive to the request including the do not repeat indicator, assigning a visitor identifier from the requestor's address;
- d.) categorizing data received with the request for the resource; and

13 e.) repeating steps a-d until reaching a session expiration.

1 20. (Currently amended) ~~One or more computer readable storage devices~~  
2 ~~having computer readable code embodied on said computer readable storage~~  
3 ~~devices, said~~ The computer program product of claim 19, computer readable  
4 ~~code for programming one or more computers to perform the method for track-~~  
5 ~~ing the use of resources on a website as in claim 19,~~ wherein the visitor identifier  
6 comprises a cookie.

1 21. (New) The method of claim 1, wherein the received request identifies a  
2 resource, and the redirection request identifies the same resource.

1 22. (New) The method of claim 1, wherein the received request identifies  
2 an address, and the redirection request identifies the same address.

1 23. (New) The method of claim 1, wherein sending a redirection request  
2 comprises sending a redirection request including a do not repeat indicator.

1 24. (New) The method of claim 3, further comprising:

2 c.1) responsive to the request not including a do not repeat indica-  
3 tor:  
4 assigning a new visitor identifier; and

5                                sending a redirection request with the new visitor identifier  
6                                and a do not repeat indicator to the client.

1                25. (New) The method of claim 24, wherein the request identifies a re-  
2                source, and the redirection request identifies the same resource.

1                26. (New) The method of claim 24, wherein the request identifies an ad-  
2                dress, and the redirection request identifies the same address.

1                27. (New) The method of claim 14, wherein receiving a redirection request  
2                comprises receiving a redirection request including a do not repeat indicator, and  
3                wherein sending the request for a resource with the new visitor identifier com-  
4                prises sending the request for a resource with the new visitor identifier including  
5                the do not repeat indicator.

1                28. (New) The method of claim 14, wherein both sent requests for the re-  
2                source identify the same resource.

1                29. (New) The method of claim 14, wherein the first sent requests for the re-  
2                source identifies a resource, and the second sent request identifies the same resource.
